Stakeholder Interview Summaries

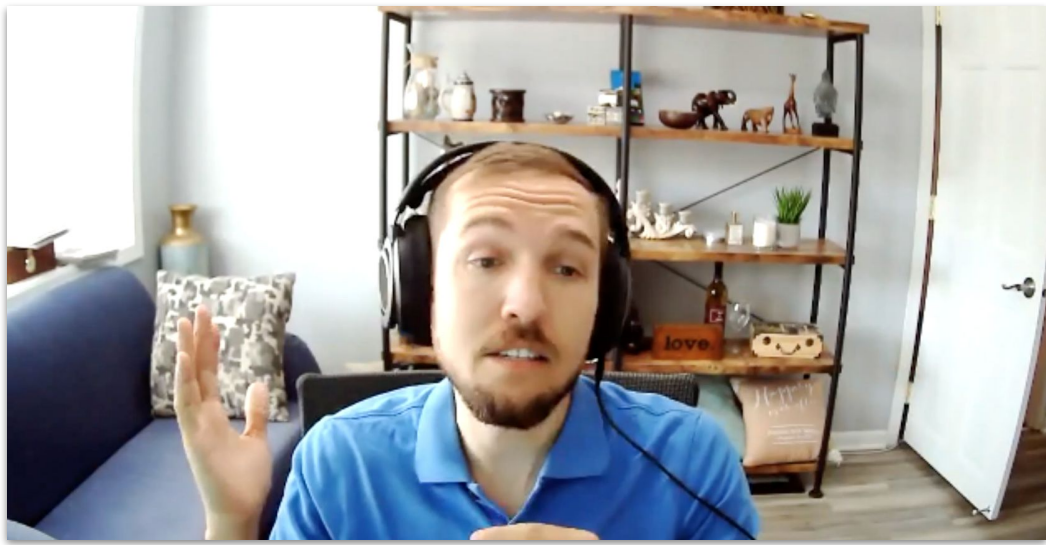

Grace Heckman

During the call with Grace Heckman, an associate brand manager, several key points were discussed. Grace emphasized the importance of efficiency when using the Numerator website, valuing immediate responses and easy access to reports. The chat function was particularly useful for quick inquiries. While she wasn't involved in the decision to use Numerator,

Grace appreciates the accessible and detailed data it provides, aligning with their consumer-focused approach. Numerator has been utilized for customized projects, and Grace communicates with her account representative for specific needs.

She suggested improvements such as providing use cases and recommendations, SKU-level data access, and valuations to justify costs. Grace finds the direct partnership and account management with Numerator valuable compared to other providers. She also highlighted the need for better formatting and easier comparison of year-over-year data. Overall, Grace has a positive experience with Numerator and recently signed up for a webinar on trade promotion effectiveness.

Josh Rizzo

Josh Rizzo, the Director of Category Insights at Topco, highlighted the importance of Numerator's ability to convert circulars into data tables, providing valuable insights for promotions. He uses Numerator Insights to answer business questions related to sales performance and unique promotions.

Rizzo appreciates the ease of use and reporting flow in Numerator compared to other tools. He suggested that Numerator's front-facing website could provide more specific information, such as panel size, to give a clearer understanding of their offerings. Rizzo also mentioned the usefulness of emails from Numerator, especially for high-level directors, while acknowledging that analysts on his team may not read them as frequently. He emphasized the value of having access to private label brand data and the ability to analyze small sample sizes, which is unique to Numerator. Rizzo pointed out that the cost and limited licenses for Numerator Insights access can be a challenge for his team.

He suggested video demos and more detailed information on the website to help potential users better understand how Numerator's platform works and how it can address their specific business questions. Rizzo also mentioned that he values case studies and business examples that demonstrate how Numerator solves real-world challenges. Overall, he finds Numerator's tool functionality meets his expectations, but suggests improvements in accessibility and communication to make his job easier.

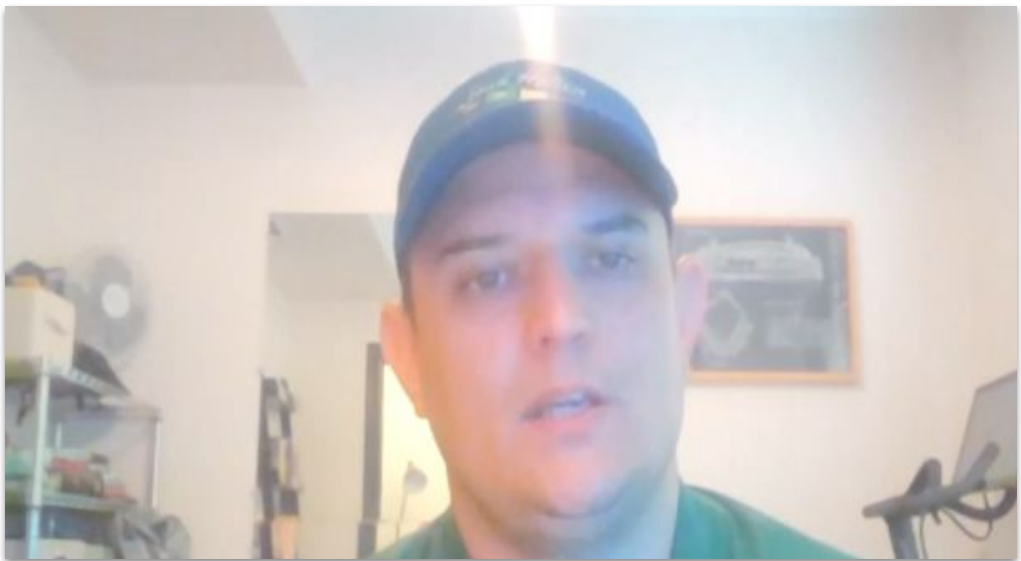

Kyle Fitzpatrick

Kyle Fitzpatrick, provided some background information about his experience and role at Numerator. He discussed how Numerator helps brands understand their shoppers and make informed decisions about their product, sales, and distribution strategies. He mentioned that brands often lack information about their consumers when selling through traditional retail channels, and Numerator fills that gap by providing data on shopper demographics and behaviors.

Kyle also explained the importance of driving revenue for brands and outlined ways in which Numerator assists in achieving that, such as opening up new distribution channels and capturing new shoppers. He mentioned specific reports like the "source of volume" report that help brands understand their market position and make data-driven decisions.

Kyle expressed that the Numerator website could be confusing for some users and suggested focusing on showcasing the impact the company can have on brands rather than overwhelming visitors with technical details. He emphasized the value of storytelling and case studies to help brands see themselves in the success stories of other customers. Kyle also mentioned the possibility of implementing a scheduling tool on the website to facilitate booking appointments with potential clients. He expressed the need for more leads and suggested that the website could help filter and vet leads based on industry and company size.

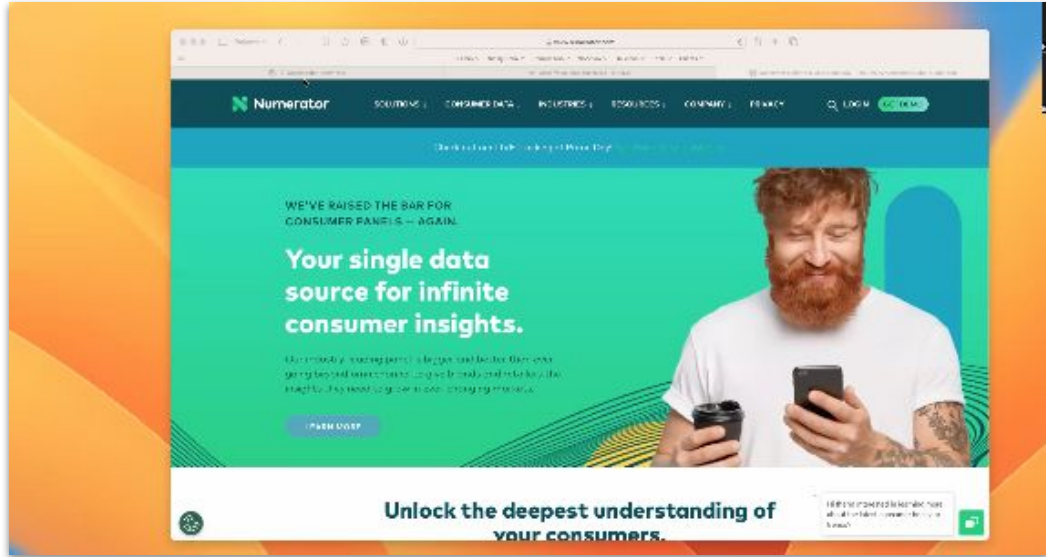

Ryne Misso

During the call with Ryne Misso, General Manager of Numerator's Data Feeds business, key insights were shared. Numerator's objective is to educate and inspire customers on the utilization of panel data for business growth. They offer a comprehensive, representative, and unbiased dataset that differentiates them from competitors. The website needs to highlight these differentiators and showcase case studies to simplify messaging and demonstrate the potential of Numerator's data sets.

Ryne emphasized the efficiency of partnering with Numerator, addressing the challenge of dealing with multiple data providers. Numerator provides a single source solution, offering omni-channel purchase behavior data and rich household profiles derived from their mobile app. This eliminates the need to source data from multiple vendors and streamlines the procurement process, resulting in cost savings and operational efficiency.

Numerator aims to accommodate client preferences through different engagement options: DIY access to the software, consulting services, and data feeds for custom analytics. The website should clearly communicate these options, educate customers on the benefits, and inspire them to leverage Numerator's comprehensive and unbiased data assets to drive their business forward.

Brian Lu

During the call with Brian Lu, a consumer insights analyst for Smart & Final stores, the focus was on the importance of data accuracy and specific item-level information in the leakage report. Brian emphasized the need for accurate data representation without duplicates or inaccuracies. He mentioned using the sharper metrics and leakage reports frequently and expressed the desire for more detailed unit price information in the leakage report.

When evaluating Numerator, Brian highlighted the significance of data integrity and the ability to verify accuracy through report connectivity. He suggested that a demo with real-world data would be crucial for assessing the platform. Brian also mentioned the usefulness of competitor information obtained from Numerator's leakage report.

To make his job easier, Brian expressed the importance of segmenting shoppers into business and household categories. He also mentioned the need for clearer instructions and explanations regarding report nuances and behaviors. Brian confirmed utilizing Numerator's consulting services to address discrepancies and obtain further details when the platform couldn't provide sufficient information.

Cheryl Rossi-O'Reily

Cheryl emphasized the need for quick access to insights about the marketplace and consumers. This suggests that speed and efficiency in delivering data are crucial for users of the Numerator platform.

Cheryl had a positive experience with Numerator, particularly praising its user-friendliness, receipt capture functionality, and the ability to provide insights across the whole store. This indicates that user-friendly features and comprehensive data coverage are significant strengths of the platform.

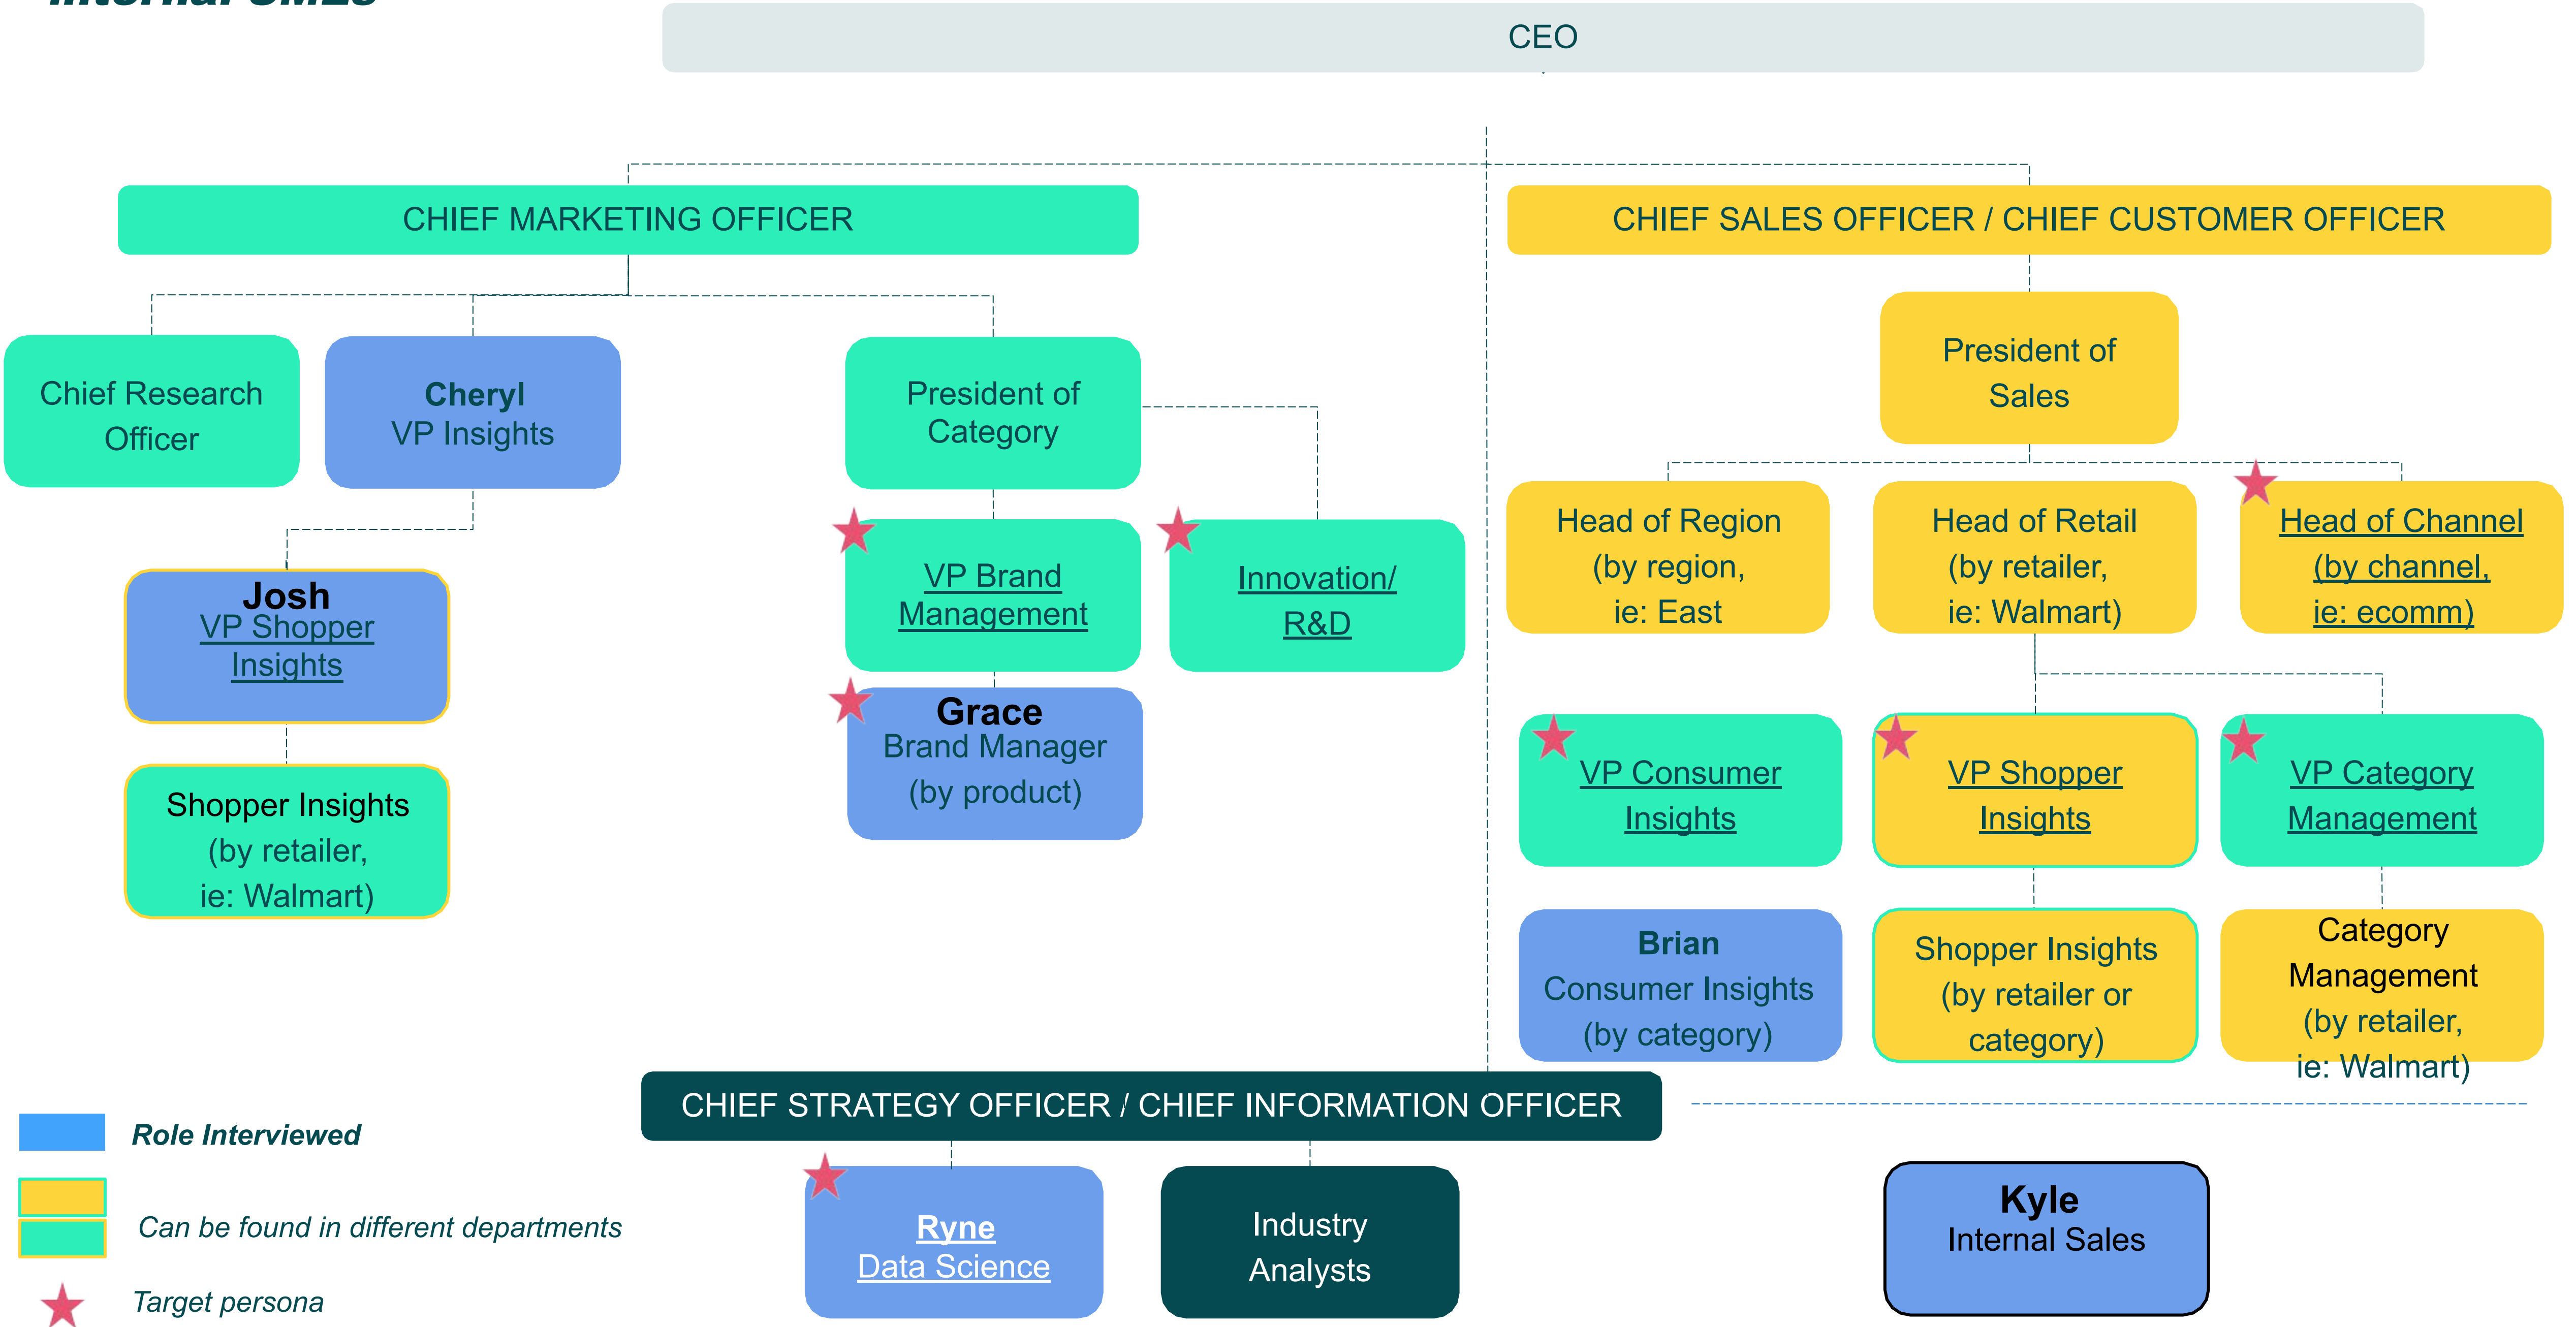

Her team actively uses Numerator's consulting hours for more strategic projects, indicating the importance of having knowledgeable consultants who can provide valuable insights and help users make the most of the platform's capabilities.

Cheryl mentioned a pain point related to a specific metric report that lacks a year-over-year comparison. This highlights the importance of continuously improving the platform's features and addressing customer feedback to enhance user experience. She also expressed a need for insights in a more shareable format, such as PowerPoint decks, to facilitate internal and external communication.

In addition, while customer is generally pleased with Numerator, she mentioned two areas where Numerator appears disjointed: 1) Communication of their solutions online - even as a long term client she can not tell the difference between all their solutions, and 2) Consultants lacking cross-functional knowledge of their solution - siloed roles and knowledge of consultant requires interacting with different consultants and sometimes makes it seem like working with 4 different companies based on what support is needed. This indicates a need for better grouping and articulation of Numerators solutions as well as well as more streamlined consulting support or improved cross functional knowledge of consultants.

Cheryl mentioned that Numerator was preferred over a competitor due to its user-friendly nature and more comprehensive data capture. This indicates that effectively showcasing the platform's advantages compared to competitors can be a persuasive factor for potential users.

Numerator Customer Organization Chart: 6 interviews conducted with 4 customers and 2 internal SMEs

INTERVIEW INSIGHTS
BRAND MANAGER

RESPONSIBILITY AND FOCUS

- Product development
- Retailing management
- Marketing
- Promotions funding

COMPETITORS TO NUMERATOR

- Circana / IRI, Global Monitor, Statista

NUMERATORS ADVANTAGE

- Simple to use
- Strong relationship / account management

UTILIZATION OF NUMERATOR WEBSITE

- Very little use of public facing website
- High utilization of Numerator browser-based insights product (subscription service)

OBTAINING CUSTOM SERVICES

- Do not use website to determine additional product/service opportunities, interact directly with Numerator Account Rep
- Not familiar with TruView product

HELPFUL FEATURES

- Chat function - Interact with Numerator at no additional cost versus hourly charge for calls
- Email notifications on events/webinars

PAIN POINTS

- Justifying cost of Numerator to leadership and finance
- Information on products/reports not presented from a customer needs perspective

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE

- Make online content as simple as possible
- Provide a True Impact Case evaluation of lift estimate from using Numerator i.e., Provide customer use cases showing the estimated value of using Numerator (true quantified estimate of lift)

BROWSER-BASED INSIGHTS PRODUCT

- Provide information on reports available from a customer needs perspective
- Improve export function of browser tool to export graphs and table better
- Provide YOY information

“I am the GM of my portfolio of brands, aiming my business towards growth”

INTERVIEW INSIGHTS

DIRECTOR, CATEGORY INSIGHTS ...

RESPONSIBILITY AND FOCUS

- Product pricing,
- Promotions, and
- Placement

COMPETITORS TO NUMERATOR

- Nielsen, Circana / IRI panels are similar

NUMERATORS ADVANTAGE

- Provides access to demographics and psychographics of customer’s brands
- Numerators Promotions is very unique. There isn’t any overlap with other competitors that are large enough to be able to serve customer
- Larger panel size and access to customers brands information at a detailed level (especially as a private label brand)
- Numerator’s large sample size (panel) allows customer to get statistically significant insights on brands (especially smaller brands)

UTILIZATION OF NUMERATOR WEBSITE

- High use of public facing website
- Has a team that utilizes the Numerator browser-based insights product (subscription service) as one of many tools used to inform the business
- Work with the Numerator team “non-stop” as a new customer. Managers have a weekly call, and Director has a quarterly standing call

OBTAINING CUSTOM SERVICES

- Not interested in additional custom services due to cost / tight budget management
- Do nonstop customized reporting within the portal. Do not purchase additional services outside of subscription

HELPFUL FEATURES

- Insight reports, access to webinars
- White papers, Active content, Inflation + Price Index, Emerging Insights
- Circulars converted into data tables
- Like ability to get incremental knowledge on industry and economy that would be difficult to find on own
- Push email notifications on updated information very useful
- Resource section is the best front facing part of website
- Chat feature is great for interacting with Numerator to get questions answered (at no additional cost)

PAIN POINTS

- Website uses lots of buzz words and does not provide sufficient substance on what Numerator does. Provides only 5% of information and user has to request for a demo for more information. Uses creative terms for products and would like to know what solution really is
- Difficult to navigate, seems like a collection of random topics, no clear business pathway to lead the user down
- Per User License based agreement is limiting (restrictive access, too expensive for large team of analysts, and inconvenient to access using a single license – competitors have better licensing)

“I’m always looking for innovative ways to capture the attention of retailers to keep my products on the shelf”

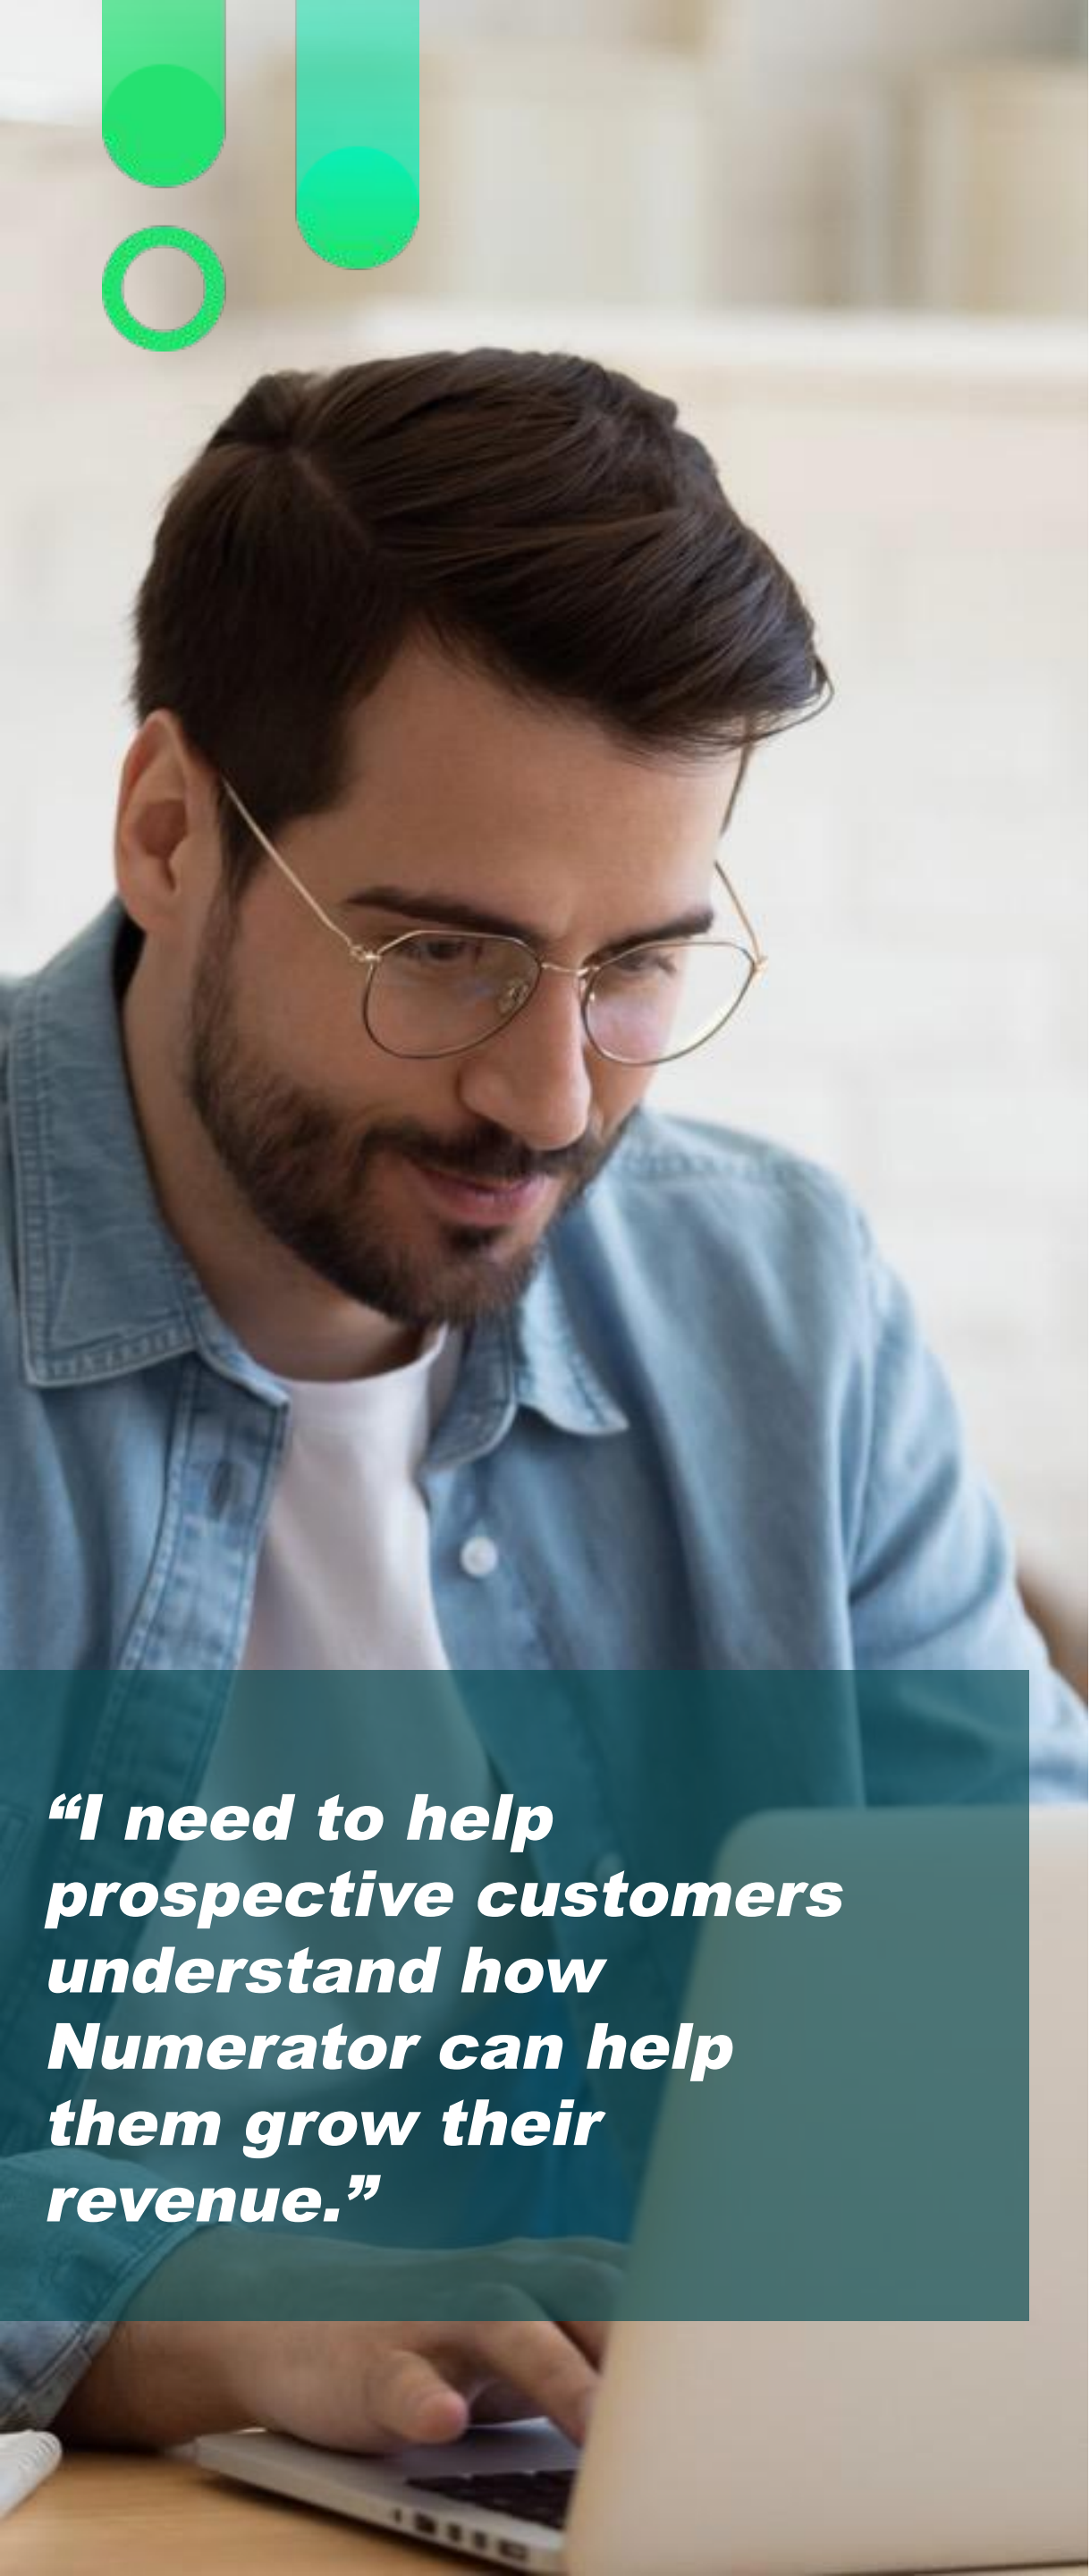

INTERVIEW INSIGHTS
DIRECTOR, CATEGORY INSIGHTS ...(cont'd)

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE	BROWSER-BASED INSIGHTS PRODUCT
 • Have more video demos that take a business question and shows how Numerator answers it using the platform i.e., show what the platform looks like, how the tool works and what business questions it helps answer • Provide real business examples on answering questions • Better access to all webinars	• Provide customer with a stoplight of reports that are being used by them along with succinct business use for each report • Do not restrict access to data via per user licenses for Insights

“I’m always looking for innovative ways to capture the attention of retailers to keep my products on the shelf”

INTERVIEW INSIGHTS

INTERNAL: NEW CUSTOMER SALES AND FORMER CPG MIDMARKET SIDE ...

RESPONSIBILITY AND FOCUS • Acquire new customers for Numerator • Help prospective customers understand how Numerator can help them grow their revenue COMPETITORS TO NUMERATOR • Nielsen IQ, Circana / IRI, Spins, Fetch Rewards NUMERATORS ADVANTAGE • Provides demographic and psychographic data to brands beyond point-of-sale information	UTILIZATION OF NUMERATOR WEBSITE • Word of mouth is key source of leads (leads are not mainly from website but are from trade shows, conferences, previous customers at new companies) OBTAINING CUSTOM SERVICES • NA / involved in only new customer sales	HELPFUL FEATURES • Content that helps prospects understand who Numerator is, what Numerator does, and how Numerator can impact the Brand performance (about 50% of users who show up to website do not know what/who Numerator is) PAIN POINTS • Site is confusing: lack of clarity on is the single solution this product is providing / what the product is solving • Site has a lot of information and can be overwhelming
--	---	---

“I need to help prospective customers understand how Numerator can help them grow their revenue.”

INTERVIEW INSIGHTS

INTERNAL: NEW CUSTOMER SALES AND FORMER CPG MIDMARKET SIDE ...(cont'd)

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE	BROWSER-BASED INSIGHTS PRODUCT
• Site should speak to brand owners first and foremost, front and center – tell what we can do for the brand not necessarily who we are • Describe the customer, their needs, and how numerator can impact the brand • Communicate the value of Numerator – where it excels (e.g., with point-of-sale data Numerator goes further than competitors to show demographics and psychographics) • Show how Numerator can help customers generate more revenue e.g., • Help open up new distribution by leveraging data to work with retailers to have more displays or more placements • Better market understanding e.g., where a product is most often purchased, what channels, which retailers... • Sell More and Bring new shoppers • Provide real supporting examples – e.g., using the Source of Volume Report there are three ways customers can see how more revenue can be / is being captured 1) Net new customers, 2) Additional purchases from existing customers, 3) Customer migration from one product/brand to another (internal cannibalization) • Build sales and distribution stories for new customers • Use case study / examples under the business issue/need – using real life brands • Increase Numerators speed to react to leads, e.g., via an easier demo scheduling approach / tool to allow prospects to book meetings online right away • Vet leads from website to capture customers that Numerator can help the most (e.g., industry vertical, business questions / goals)	• NA

“We need to tell customers what we can do for their brands.”

INTERVIEW INSIGHTS
INTERNAL: DATA SCIENCE

RESPONSIBILITY AND FOCUS

- Commercialization of our raw panel data assets
- Support use cases beyond beyond what software (Insights) supports
- Understand utility of data outside Numerator
- Help customers integrate and better curate insights into their bespoke data sets
- Illuminate how data feeds can power all sorts of different functions within customers business

COMPETITORS TO NUMERATOR

- Circana / IRI, Nielsen, Fetch

NUMERATORS ADVANTAGE

- Most comprehensive, most statistically sound, unbiased panel dataset within the US

UTILIZATION OF NUMERATOR WEBSITE

- Low utilization of public facing website

OBTAINING CUSTOM SERVICES

- One of three ways of working with Numerator

HELPFUL FEATURES

- Timeliness of evolving, relevant Insights

PAIN POINTS

- Have multiple data sources, analysis paralysis (and difficulty integrating all sources), inherent inefficiencies of work across multiple data source
- Need to be more efficient and less costly with data sourcing

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE

- Be a source of inspiration, education, and source of clarity on how data set can be used to drive growth beyond what has been historically possible by panel data
- Provide more verified case studies from clients
- Simplify the message to focus more on core Numerator differentiators from the competition: e.g., **A)** Completeness of coverage i.e., completeness of consumer buying behaviour across channels; **B)** Single source of omni channel purchasing behaviour data which is inherently more efficient; **C)** Most representative unbiased source of consumer buying behaviour **D)** Multiple ways to work with Numerator based on customer preferences e.g. **i)** Do it yourself - (Insights subscription), **ii)** Do it for you (Customized services), or **iii)** Build it yourself (Data feed)

BROWSER-BASED
INSIGHTS PRODUCT

- NA

“I am looking for the insight within the ambiguity”

INTERVIEW INSIGHTS

CONSUMER INSIGHTS ANALYST

RESPONSIBILITY AND FOCUS

- Initial research for marketing reporting
- Ecommerce trends
- Designing surveys
- Data integrity

COMPETITORS TO NUMERATOR

- None mentioned

NUMERATORS ADVANTAGE

- Provides insights into what/how brand’s competitors are doing: where customers are going down to an item level. Other competitors cannot provide this level of detail

UTILIZATION OF NUMERATOR WEBSITE

- Low utilization of public facing website
- Utilization of Numerator triggered when 1) there is a variance, e.g., determine why there has been a dip in sales, 2) need to identify what type of segment / shoppers to market to
- Most recent interaction was the Inflation White Paper

OBTAINING CUSTOM SERVICES

- Sales and merchandising have their own consultants for more technical and costly analysis
- Rely on Numerator’s assistance when the platform cannot provide the needed details

HELPFUL FEATURES

- Metrics report
- Leakage report

PAIN POINTS

- Determining integrity of data (specificity, accuracy, no duplication) for sales revenue, costs, impacts, etc.
- Understanding how different reports are connected and if data reconciles across reports
- Accuracy of unit prices when data is broken down to the item level

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE

- Use demos to better address / demonstrate Data integrity, Report connectivity / linkages, etc.

BROWSER-BASED INSIGHTS PRODUCT

- Keep reports up-to-date and/or explain how each report works
- Show how to reconcile reports to one another
- Improve platform to make it possible to further segment shoppers between Households and Business shoppers

“I need to be able to explain what is happening in our stores - based on consumer behavior and preferences down to an item level”

INTERVIEW INSIGHTS

VP INSIGHTS AND ANALYTICS

RESPONSIBILITY AND FOCUS

- Sales and marketing analytics
- Getting insights on the market place, consumers / shoppers

COMPETITORS TO NUMERATOR

- Infor Scout, AC Nielsen, IRI

NUMERATORS ADVANTAGE

- More user friendly platform, easier to pull information quickly
- More comprehensive view of shoppers across the whole store instead of just specific to a single category
- Data captured in a more organic way that encourages shopper participation and gives better, comprehensive, high quality view of how the shopper shops (versus “Legacy Panels”)

UTILIZATION OF NUMERATOR WEBSITE

- Driven by weekly emails that links to website
- Most recent interaction was with an email pulse on SNAP recipients and how they are shopping differently

OBTAINING CUSTOM SERVICES

- Have 8 hours of consulting services per month. Consultant initially utilized around platform, now being utilized in more strategic way

HELPFUL FEATURES

- Emerging insights
- InChat feature is amazing
- Weekly emails with summary of major trends

PAIN POINTS

- Getting a better, comprehensive, high quality view of how the shopper shops
- Getting a clear sense of what Numerator actually does and provides (vs. high level generic statements)
- Can’t tell the difference between solutions Numerator offers (on website). Seem disjointed
- Consultant support is siloed into specialist roles and so its like working with 4 different companies based on what support is needed. Feels very disjointed internally
- Report connectivity and data accuracy (all platforms)

NUMERATOR OPPORTUNITIES

NUMERATOR PUBLIC FACING WEBSITE

- Improve clarity of, and differentiation between, solutions offered
- Show how solutions interact, or not, and spell out what each really delivers
- Provide insights from Pulse emails in a shareable format (PDF, PPT) to be able to engage others
- Articulate why Numerator’s data capture is better and more insightful than other competitors based on how data is being captured

BROWSER-BASED INSIGHTS PRODUCT

- Provide YOY shopper metrics reports
- Make it easier, more streamlined, to get consulting support across different areas (i.e. have consultants who can provide solutions across Numerators suite of services)

“Honestly as a client for as long as I've been a client, I still can't tell the difference between all of their solutions”

FRUSTRATIONS

- Find an affordable solution / relevant data that helps increase revenue of consumer-packaged goods categories, brands, and products

- Difficult to understand how Numerator can help achieve goals from website
- Explanation of Numerator solutions too generic
- Need to schedule a demo to better understand how Numerator can help
- Justifying cost of Numerator / communicating the value of Numerator
- Site more company-centric than customer-centric
- Numerous data sources: High cost and inefficiency of having multiple data vendors and feeds

HOW CAN WE HELP?

Good

Great

WHAT MATTERS TO USERS

- Clear simple content
- Solution to business problems
- Affordable business solutions
- Data efficiency
- Insights into what their competitors are doing
- Data integrity and connectivity of reports
- Across the store insights versus insights into a single category
- Strong, easy to access, one-stop-shop consulting support

Navigation

- More intuitive navigation with easy-to-understand summary drop-downs

Content

- Provide customer-centric, solution focused content
- Improve clarity of, and differentiation between, solutions offered
- Show how solutions interact, or not, and spell out what each really delivers
- Be a source of inspiration of how panel data can be utilized to drive customer growth
- Message on Numerator's core competitive differentiators
- Show the different ways to work with Numerator based on client preferences, capabilities and budget (as a solution)
- Provide shareable content from pulse emails (PDFs, PPTs)

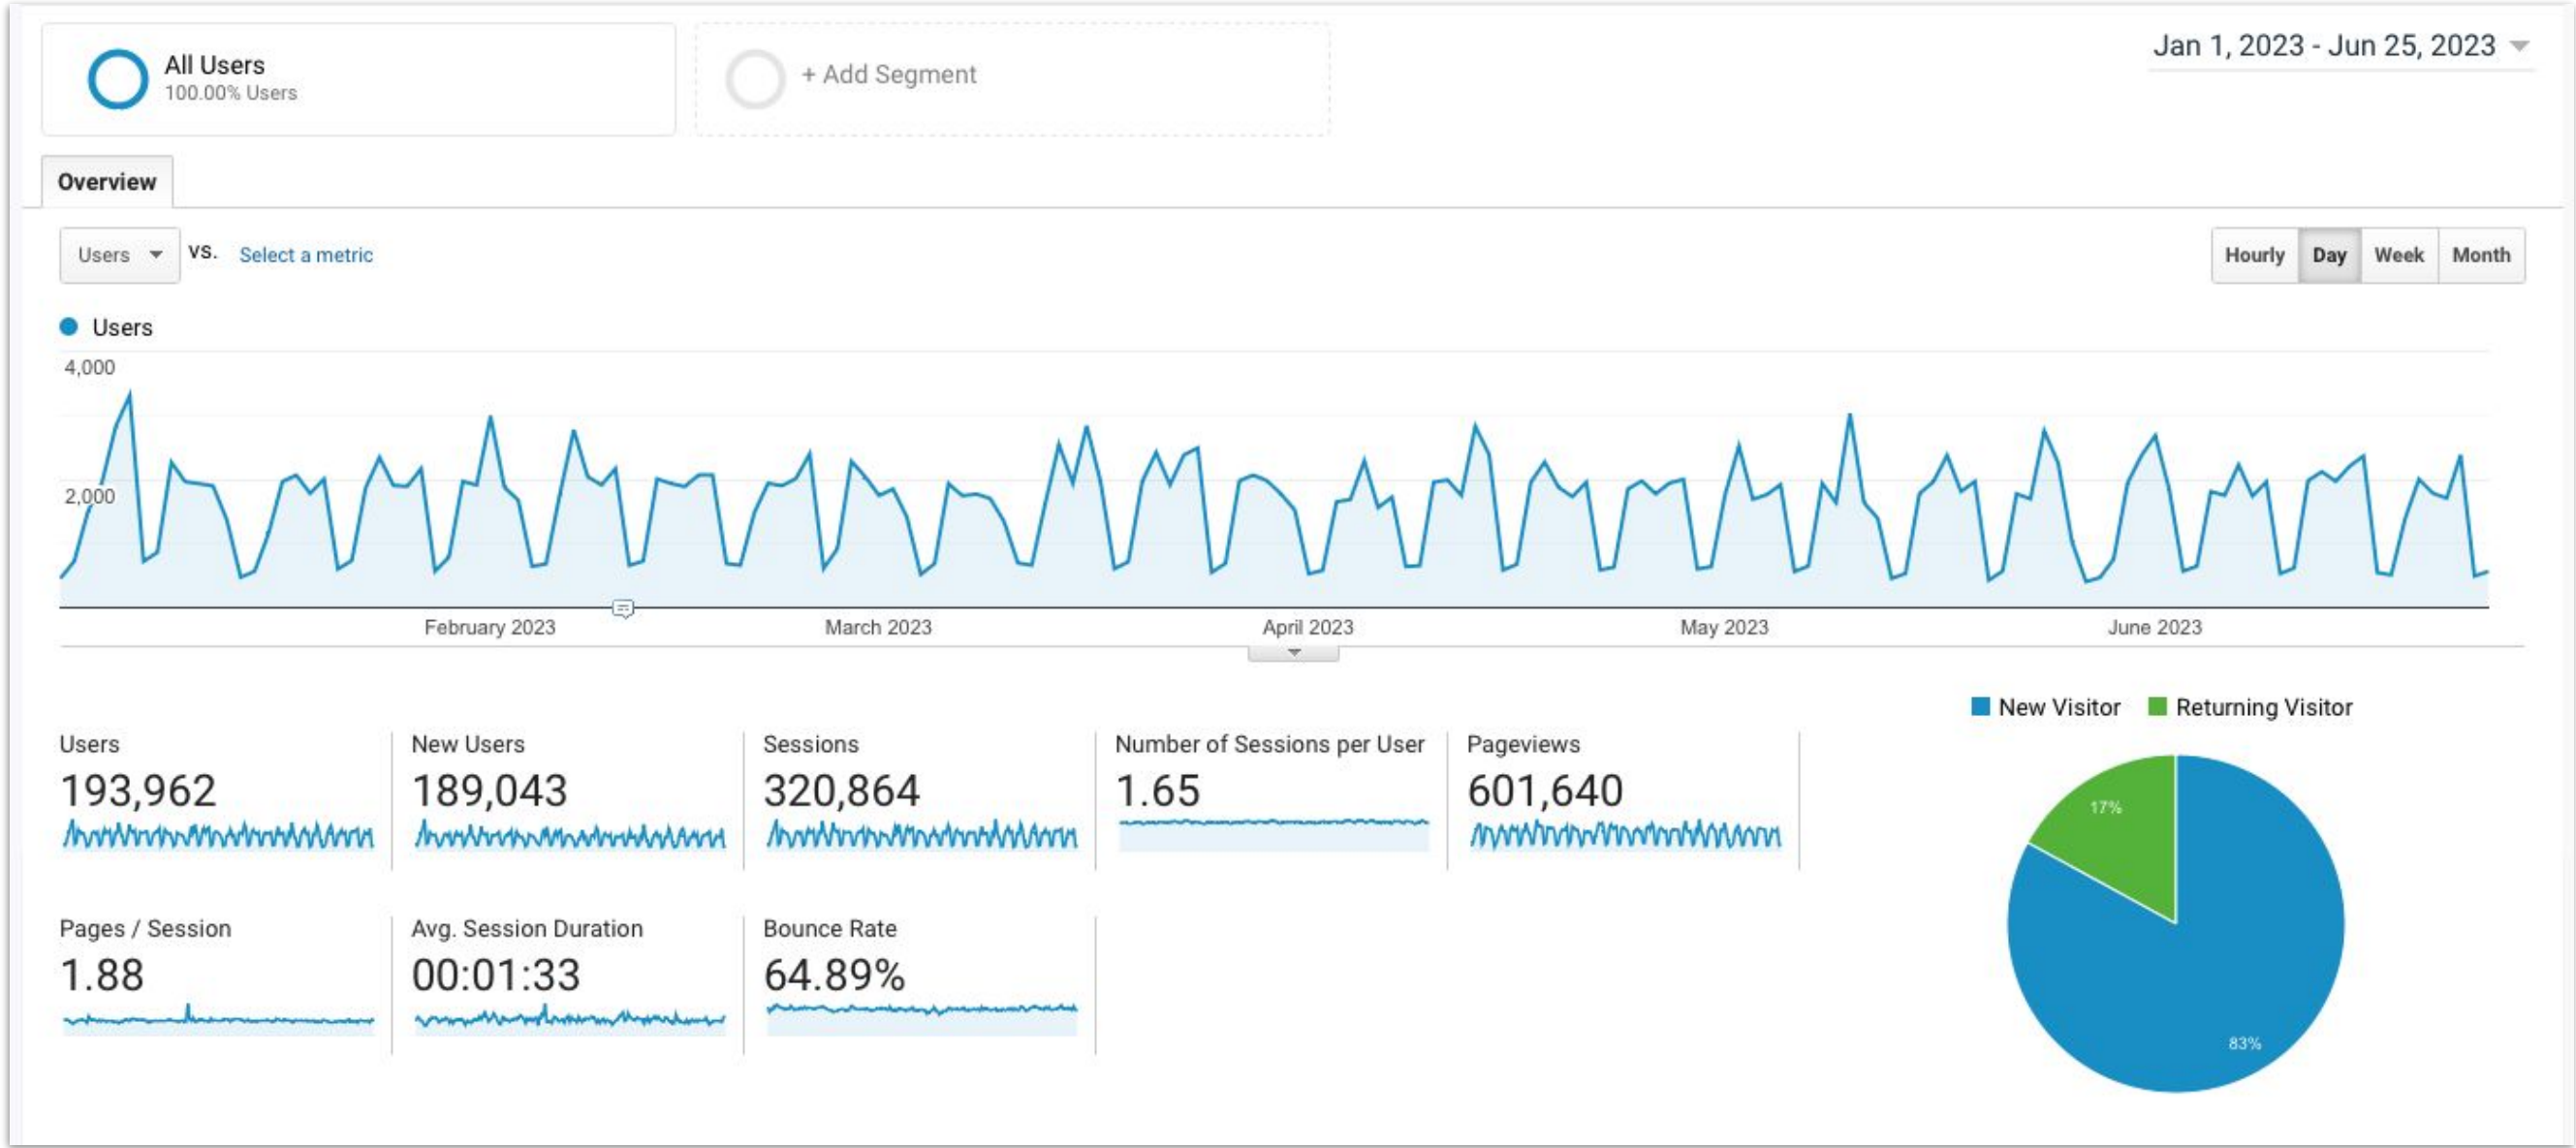

Examples

- True impact case studies (verified cases from clients on impact of Numerator)
- Business solution case studies
- Sales and distribution stories
- Video solution demos

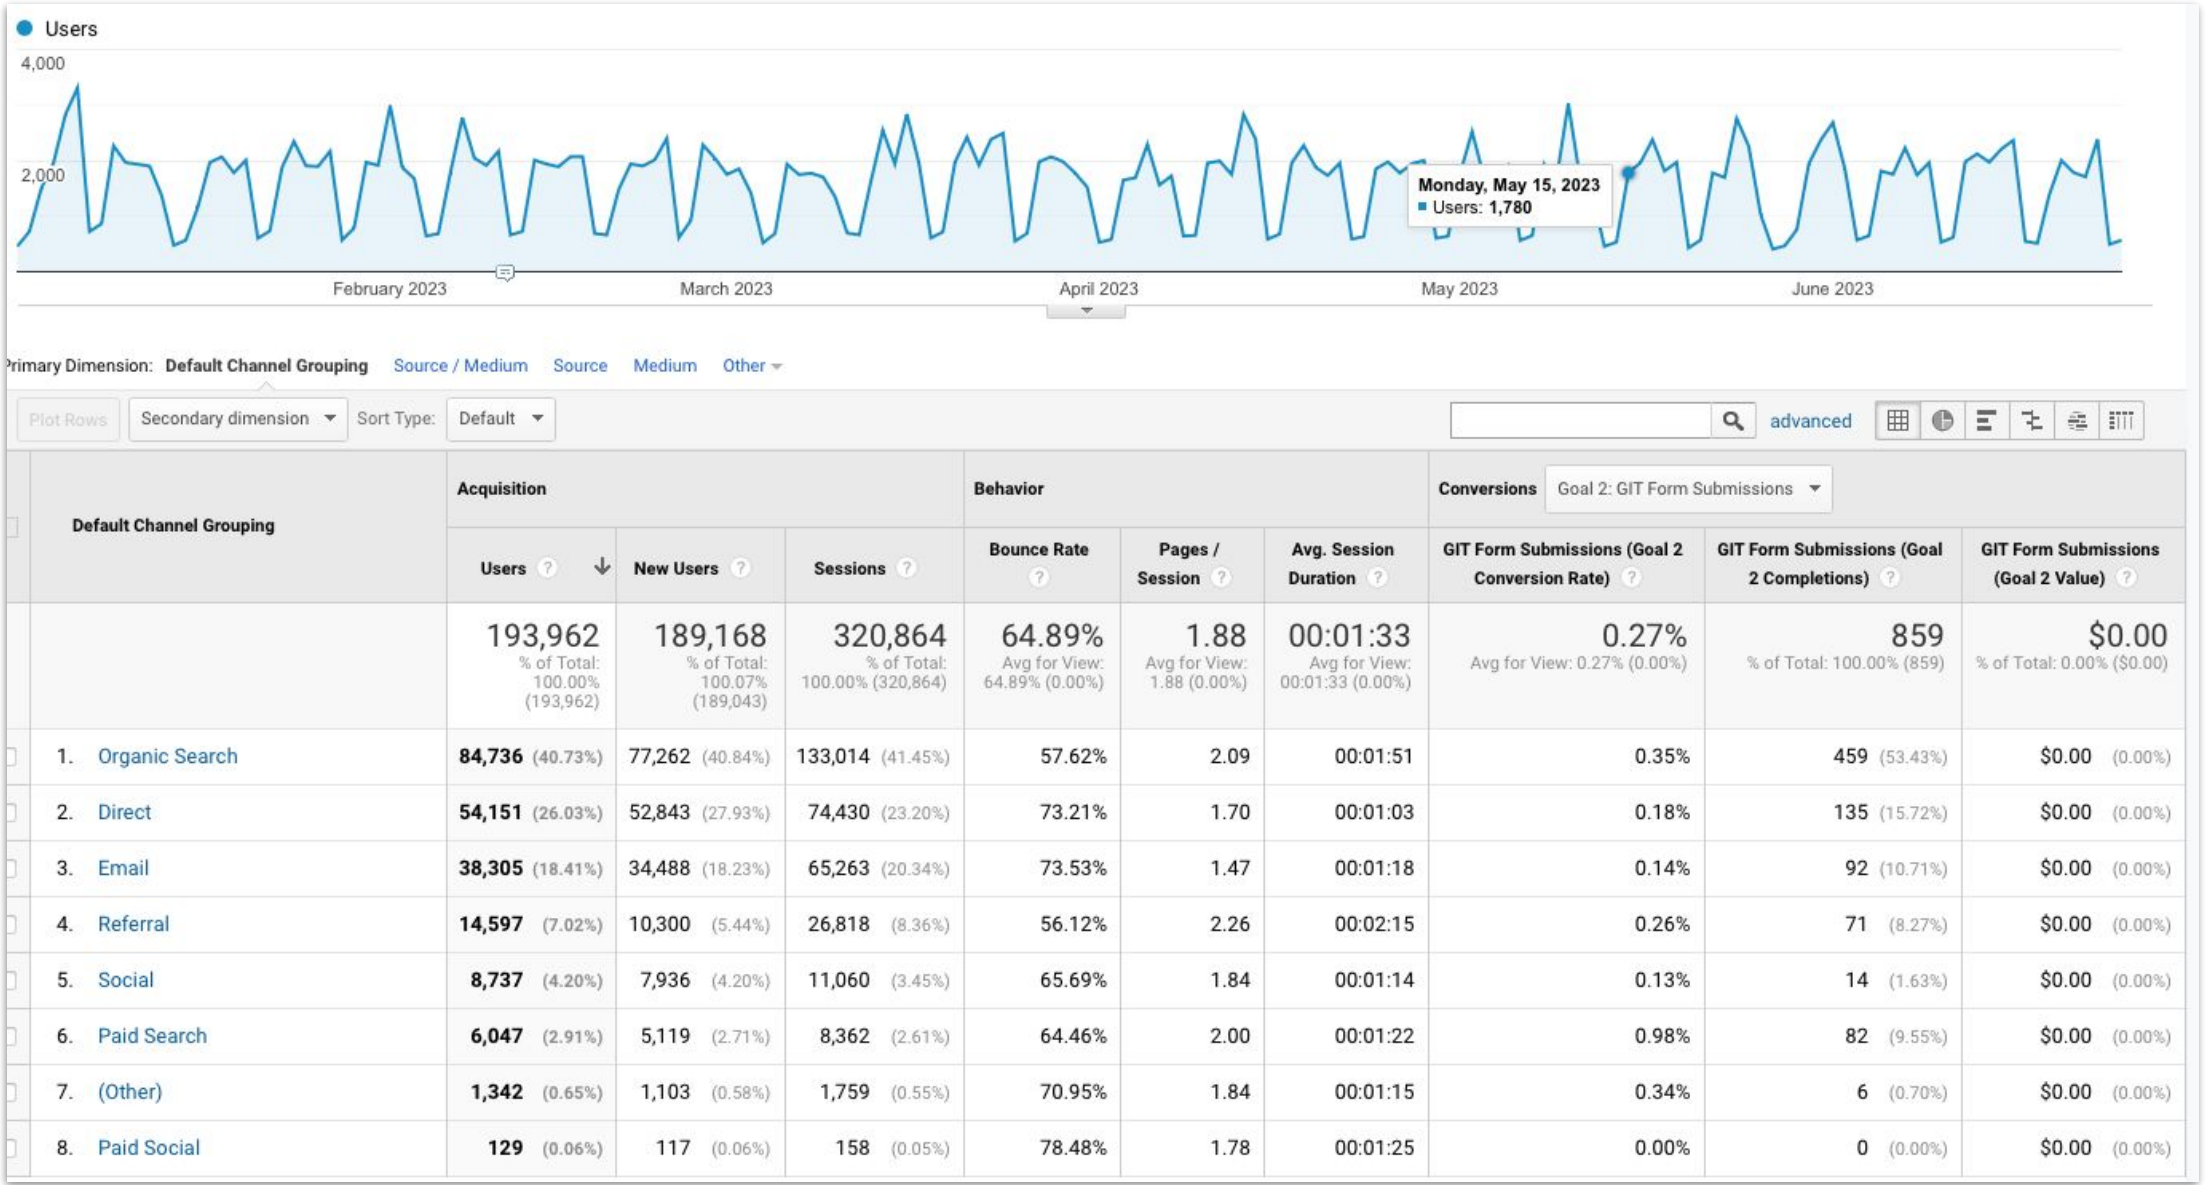

Other

- Online demo scheduler
- Vetting of online leads

Analytics Review

83% of website users are classified as new. Most don’t go past two pages per session. Might there be an opportunity to expose them to more pages or have they found what they have been looking for on choice landing pages?

Organic search, direct and email channels are top drivers for website traffic. These also drive Numerator’s GIT form submissions. There is an opportunity to increase the conversion rate, by making forms more prominent, approachable and interactive.
