We are starting to see in some orgs, consumer insights shifting over to sales organization from marketing

CEO

PERSONA SHOPPER INSIGHTS

As a Shopper Insights professional, I need to have a deep understanding of shopper behaviors, drivers, and sentiment so I can leverage these insights to influence my business' sales and marketing efforts with retailers. My objective is to build strong relationships with retailers to fight for more shelf space for my products to increase HH penetration and buy rate. I also use category and cross category insights to surface category trends and white space opportunities. My team sits in the field, located at the retailers' headquarter, and we need easy access to shopper insights for ad hoc retailer meetings.

PRODUCTS I CAN USE: Insights, Survey, TruView, Promo Intel

LINK TO ONE PAGER: [SHOPPER INSIGHTS](#)

OBJECTIVE

- Influence my business' sales and marketing efforts with the retailers, driving more shelf space for my products and brands
- Answer more pointed & diagnostic questions of the WHY, HOW, and WHEN of shopper behaviors in the store and online
- Leverage these insights to build stories that will improve distribution, assortment, placement, and promotions

NEED TO KNOW

- Deep understanding in their category and adjacent categories, allowing them to lead white space discovery and overall retail strategy
- Analysis tends to be retailer and channel focused -- need to understand retailer share for those retailers they call on
- Shopper behavior metrics that has a dollar amount attached to it to make their case to retailers

PAIN POINTS

- Can't always get my needs met by centralized research teams
- Looking for innovative way to capture the attention of retailers

MEASURE OF SUCCESS

- Increasing HH penetration, buy rate, % repeat, promo effectiveness

WORK CLOSELY WITH

- Sales teams in the field (internal)
- Support Category Manager with shopper focused metrics to complement their research (internal)
- Retailers (external)

HOW I GET INFO

- Peer/colleague recommendations
- Events (GRIT, Quirks, CMA, etc)
- Heavily influenced by what data sources my customers (retailers) are using internally

"I'm always looking for innovative ways to capture the attention of retailers to keep my products on the shelf"

PERSONA CATEGORY MANAGER

As a Category Manager, I have a dedicated list of retailers. These retailers rely on me to bring them deep category insights to help them develop operational plans for their business, including planograms, product assortment, promotional tactics, distribution, merchandising, shelving and pricing. To do this, I need to understand category level performance, trends across channels, and category conversion metrics to create compelling retailer-focused strategies and presentations. Sometimes I will pull in my Shopper Insights counterpart to include some Shopper centric metrics to complement my research.

PRODUCTS I CAN USE: Insights, Survey, TruView, Promo Intel

LINK TO ONE PAGER: [CATEGORY MANAGER](#)

OBJECTIVE

- Be a strategic partner to my retailers to bring objective category insights that can guide retailer planning across planograms, product assortment, promotional tactics, distribution, merchandising, shelving and pricing
- Drive category growth/penetration of my brands at a retailer
- Develop category best practices a
- Proving deep understanding of the category positions me and my brand to win category captaincy

NEED TO KNOW

- Deep category insight with full understanding of products, assortment, promotions and pricing
- Analysis focused on category growth; tend to use a lot of POS to understand how long items stay on shelves, etc.
- Analysis that is objective to the category
- Shopper behavior metrics that has a dollar amount attached to make case to retailers

PAIN POINTS

- Can't always get my needs met by centralized research teams
- Looking for innovative way to capture the attention of retailers

MEASURE OF SUCCESS

- Market share growth for the category or retailer(s) -- the latter is especially important if the brand is the category captain for the retailer
- New distribution

WORK CLOSELY WITH

- Sales teams in the field (internal)
- Shopper Insights team to drive research and story development (internal)
- Retailers (external)

HOW I GET INFO

- Peer/colleague recommendations
- Events (GRIT, Quirks, CMA, etc)
- Heavily influenced by what data sources my customers (retailers) are using internally

“I need to be the category expert to my retailers to develop and coordinate best in class operational plans”

PERSONA CONSUMER INSIGHTS

I need to understand the consumers of my business and cascade that information to functions like brand, innovation, marketing and finance to build strategies that drive the business forward. I advise them on consumer behaviors, perceptions, needs, and wants associated with our products, the competition, and overarching category trends. I execute qualitative, category focused research to support longer term projects like product innovation and developing learning plans. It is critical to be efficient with my time because I manage research for multiple brands in the portfolio, so I often outsource our research needs. As such, I am also responsible for selecting third party research partners who can also provide white glove service to help get the job done.

PRODUCTS I CAN USE: Insights, Survey, TruView
LINK TO ONE PAGER: [CONSUMER INSIGHTS](#)

OBJECTIVE

- Use consumer understanding to create demand for brands and products and help drive strategy and innovation
- Manage all aspects of research projects, from recommending methodologies, identifying partners, managing design, scope of research, and budget
- Service the needs of internal business and marketing while also bringing fresh insights to our retail partners

NEED TO KNOW

- When, why, and how people interact with a brand or category
- Analysis that is objective to the category
- Qualitative insight to analyze brand perception/equity
- Analysis on new product performance and longevity

PAIN POINTS

- Multiple internal customers asking for information
- Limited resources (versus a proliferation of tools)
- Balancing periodic, detailed research with fast turnaround in a dynamic market

MEASURE OF SUCCESS

- Category growth, new item performance
- Executing and meeting goals of learning plans
- Moving an initiative through process/stage gates (ie: brainstorm to testing)
- Brand equity compared to competitive set

WORK CLOSELY WITH

- R&D/innovation (internal)
- Finance (internal)
- Brand Managers (internal)
- Agencies (external)
- Retailers (external)
- Consumers themselves (external)

HOW I GET INFO

- Predominantly through peer recommendation (word of mouth, LinkedIn sharing among colleagues)
- Thought leadership pieces in well recognized publications
- Larger organizations may maintain an internal list of preferred partners, sourced by procurement
- Do not often attend trade shows/events

“I am the voice of the consumer and I also have to be the objective truth”

PERSONA BRAND MANAGER

I build strong commercial plans to help the business grow and win with the consumer – overseeing strategies on packaging, pricing, distribution, merchandising, positioning, and more. I spearhead the annual planning for my business, using consumer insights to build strategies that will drive sales, profit, share and equity gain. I lean on my Consumer Insights team to get market research that helps me find growth opportunities and understand everything from consumer base expansion, brand health, to test copy, create consumer claims, make packaging claims, and more. I also own the P&L for my brand, so I need to justify my investments in traditional media, digital and retail channels by tracking results. My success hinges on whether or not I grow my brand's share.

PRODUCTS I COULD USE: Insights, Survey, TruView, Ad Intel

PERSONA ONE PAGER: [BRAND MANAGER](#)

OBJECTIVE

- Own and manage P&L
- Identify and develop shopper programs that align with both retailer objectives as well as internal sales and brand team goals
- Maintain a business orientated lens to drive growth and find new growth/innovation opportunities
- Drive strategic planning for key marketing activation at the retailer

NEED TO KNOW

- When, why, and how people interact with a brand or category
- Share of my brand / competitive brands
- Shopper behavior metrics with dollar amounts to optimize P&L and activation strategies
- Analysis on consumer demographics and psychographics
- Promotion performance
- New item performance to drive innovation

PAIN POINTS

- A lot of available tools and resources and usually rely on teams to provide the data; sometimes, the teams may not be able to provide information as quickly as needed
- Insights can conflict with so many sources of data and tools, difficult to go through everything and land at "one source of truth"
- Insights aren't fast enough to implement optimizations when it matters

MEASURE OF SUCCESS

- Evaluated on brand share growth and can lose their job based on this metric
- Brand growth, brand equity, category share
- Measurable marketing ROI
- Bringing new innovations to market

WORK CLOSELY WITH

- Accountable to business leaders (GMs or managers)
- Sales teams in the field (internal)
- Consumer Insights (internal)
- R&D (internal)
- Retailers (external)
- Agencies (external)

HOW I GET INFO

- Predominantly through peer recommendation
- Thought leadership pieces in well recognized publications
- Larger organizations may maintain an internal list of preferred partners, sourced by procurement
- Do not often attend trade shows/events

"I am the GM of my portfolio of brands, aiming my business towards growth"

PERSONA DATA SCIENCE

As a Data scientist, I am often tasked with handling highly complex business problems, using data to identify what the solution might be. I am responsible for cleansing and structuring the data that drives my organization's machine learning and deep learning capabilities. I receive large volumes of data from multiple sources and in multiple formats, sync the data to work well together, then identify insights and opportunities. I continually iterate and optimize the data, especially when new data sources are introduced. With this data, I create proprietary ways to track the insights (ie: market share) that gets pushed into an internal dashboard that can be used by other areas of the organization like Consumer Insights, Shopper Insights and Executive leaders. The data can also drive the development of our internal automation to improve operations, build models, and feed into data lakes and CDPs.

PRODUCTS I COULD USE: Data Feeds (Ideally delivered with metadata)

OBJECTIVE

- Own the collecting, packaging and analyzing of data to create actionable solutions for company operations, products, and marketing
- Drive analytics, anticipate bottlenecks, make tradeoffs, and take acceptable risks to maximize the benefit for the customer and business
- Create and present insights to ensure they are understood and leveraged broadly across key stakeholders

NEED TO KNOW

- Typically needs the raw data to run independent analysis or integrate with other data sources (typically large volumes of transaction, marketing and customer level data)
- Analytical techniques like regression (multivariate, logistic, etc.), customer modeling (segmentation, propensity modeling), forecasting (demand, sales), baselining, etc. to understand impact of various behavioral variables on sales and other key KPIs

PAIN POINTS

- Responsible for large amounts of data, but do not always have a say in what data sources the organization uses
- Data is delivered from multiple sources that is all delivered in a different format
- We speak a technical language that is not widely understood outside data science teams

MEASURE OF SUCCESS

- Accuracy of forecasting, modeling, analytics, etc. and tracking over time
- Continually minimizing margins of error

WORK CLOSELY WITH

- Engineers and analysts (internal)
- Executive leaders (internal)
- Manufacturer and Retailer may have data science teams that interface with each other, technical conversations (external)

HOW I GET INFO

- Industry news from reputable sources (Databricks, Snowflake)
- Blogs from other data sci with use cases on how to best leverage data
- Events (like Strat Data and Transforming Data with Intelligence)

"I am looking for the insight within the ambiguity"

PERSONA ECOMMERCE VP

I lead a team that is responsible for all aspects of my company's ecomm strategy. While my team is siloed from the rest of the organization, I am connected across brands as a shared resource. We have a dedicated ecomm agency team, cat man team, finance team, and even a data science team that's specifically focused on ecomm. My scope of work is wide and I oversee everything from sales strategy, to online promotions, channel strategy, category strategy, packaging and more. My job is very sales orientated, and I must highlight the impact of online sales to offline sales to prove the incremental value of investing in a strong presence online. This means I work closely with online retailers like Amazon, Instacart and Kroger to understand how shoppers are navigating their websites, how products are being found, what promotions are most effective, etc. so I can determine which retailers will drive the greatest ROI for the portfolio by including more categories or brands. With a quickly changing landscape, it is critical that I keep a pulse on emerging areas of growth in ecomm and digital.

PRODUCTS I CAN USE: Insights, Survey, TruView, Promo Intel

OBJECTIVE

- Develop sales strategy, channel strategy, category strategy, online promotion strategy
- Deep channel shifting understanding to demonstrate the incremental value of having an ecomm presence without sacrificing sales in store
- Understand online metrics retailer by retailer to identify the greatest sales opportunities for the portfolio

NEED TO KNOW

- Online retailer and channel focused analysis -- need to understand retailer share for those retailers they call on
- Shopper behavior metrics that has a dollar amount attached to it to

PAIN POINTS

- Own a separate budget, but often not prioritized/highly funded, need to make dollars go further and be creative on how to win additional funding
- Ecomm metrics may be deprioritized due to perception that Shopper Insights delivers similar insights (but not to the detail to win in the online space)
- Landscape of ecomm is not uniformly defined, creating complexities on how the data/metrics are presented and creating blind spots when data does not properly integrate

MEASURE OF SUCCESS

- Grow sales on the platforms I oversee
- Grow category share
- Improve digital sales metrics (ie: operational points, on time ship and fill rates)

WORK CLOSELY WITH

- Shopper Insights (internal)
- Marketing (internal)
- Brand Managers (internal)
- Online retailers (external)
- Agency (external)

HOW I GET INFO

- Recommendations from colleagues
- Industry events (Shoptalk, Grocery Shop)
- Vendors often sponsor events and pay to have meeting with ecomm lead
- Consulting companies like MediaLink may make introductions to C-Suite

"I need to prove the incremental value of having a strong online presence."

PERSONA INNOVATION

I'm responsible for developing new products and getting innovation ideas through the stage-gate process. I work closely with Consumer Insights to ideate and establish feasibility for products in the development pipeline before handing finished products off to Brand and/or Commercial teams for execution on go-to-market strategies. Managing the pipeline can include conceptualization, proposal, idea validation, competitive analysis, demand planning and test launch. My role can be that of an individual or a cross-functional team, and I can work closely with or distant (especially if they want me to "dream big") from commercial teams, depending on the organization.

PRODUCTS I COULD USE: New Item Insights, People Insights, Survey, TruView, Brand Insights

PERSONA ONE PAGER: [INNOVATION & R&D](#)

OBJECTIVE

- Drive product development pipeline from concept to launch (product, feasibility, packaging, taste, etc.)
- Partner with Consumer Insights to extract insights into consumer needs, wants and preferences
- Facilitate margin enhancement by working with Brand Managers to bring new products to market
- Fully understand the market, the competitive landscape, and technology of the industry

NEED TO KNOW

- Deep understanding of consumer pain points with market options
- Market trends that capture customer needs/wants/preferences
- Competitive market offerings
- Past innovation launch performance
- Ability to identify "white space"

PAIN POINTS

- Budget restraints
- Synthesis & analysis of qualitative data
- Poor testing with consumers
- Leadership overreach (pet projects, scrapping projects late in development, etc.)
- Access to category intel for innovation aimed at entering new categories

MEASURE OF SUCCESS

- Successful pipeline management & new product launches
- Margin enhancement (product profitability)
- Support incremental brand growth

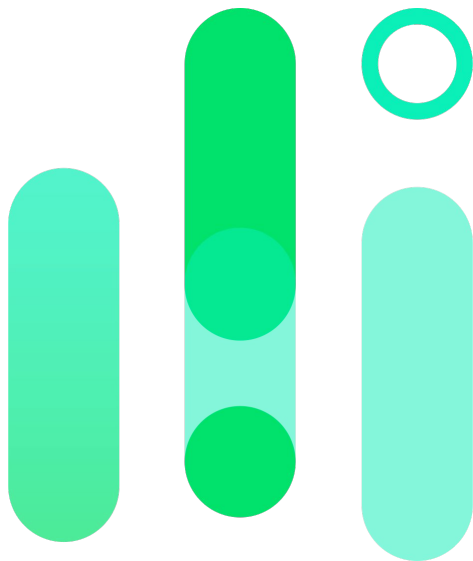

WORK CLOSELY WITH

- Consumer Insights (internal)
- Brand Managers (internal)
- Sales teams in the field (internal)
- R&D (internal)

HOW I GET INFO

- Industry trends publications (Trendhunter, etc.)
- Trade shows (varies by industry - Expo West for food and Beverage)
- Competitive POS & market data (used for trending)

"I create and manage the pipeline of new product ideas to bring to market"

Brand Manager Appendix

Who are Brand Managers and what do they do?

OBJECTIVE

- Own and manage P&L
- In traditional CPG orgs, own and develop business strategy
- Identify and develop shopper programs that align with both retailer objectives as well as internal sales and brand team goals
- Maintain a business orientated lens to drive growth and find new growth/innovation opportunities
- Drive strategic planning for key marketing activation at the retailer

Key Projects and uses of Data

Category Landscape Analysis

A category review from previous year to see who won, who lost, what changes have taken place with consumer, and how their brand performed. Assess sales, new comms, new products, brand/retailer pivots

Data: POS (consumption and distribution), limited access to panel, New product performance, Survey

Brand Plans

Strategic roadmap on how brand will hit revenue targets for next year, and strategic 3 and 5 year vision for brand. Presented to ELT for buy-in

Data: Cat. Landscape findings, Industry trend reports (mintel, euromonitor, etc.)

Comms Plans

Larger brands will update messaging on a annual basis (TV, Online, print, etc.). Sometimes complete positioning overall will take place if necessary. Partner with creative Agency to develop

Data: Cat. Landscape findings, Panel data, Survey, consumer testing once message is created

New Product Inno/Reno

Brands will launch new products or update current SKUs annually to protect or expand shelf space. Changes are deeply rooted in consumer insights and preference

Data: Cat. Landscape findings, Panel data, Survey, POS

"I am the GM of my portfolio of brands, aiming my business towards growth"

Brand Manager Annual Calendar: Projects Involving Panel Data

	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
Landscape												
Brand Plans												
New product /Reno Pipeline dev												
Comms Planning												

- Category landscape:** Brand team partners with CI & BI to assess total category review for previous year and how their brand performed accordingly. Use Consumption data and panel to understand shifts in consumer demand
- Brand Plans:** Brands use insights from category landscape, consumer panel, previous survey work, and industry reports to develop next year's GTM strategy and long term brand horizon goals
- New Product Development/Renovation:** To protect current shelf space and help grow space brands will launch new products and improve old products every year. Leveraging panel data, consumption data and industry reports a pipeline of concepts are created and then test robustly with various consumer surveys or advisory groups
- Communication Planning:** Larger brands will look to update their communications plans (TV ads, online messaging, other advertising tactics) every year. During the development process of the comms plans, teams will partner with their creative agency on new messaging. The brand and agency lean heavily on panel information for message targeting and surveys to hone in on details and test response

Event Calendar for Brand Plans

Q1

Brand/category landscape analysis on prior year performance

- How did Brand perform vs. goal (mkt share & GR)
- What brands won, what brands loss
- Any new themes in category to consider for next year

Data used

- POS Consumption data
- Panel Metrics
 - Buyers won/loss
 - Source of volume
 - Repeat, loyalty
- Ecomm purchase data
- Marketing Mix (from agency)
 - Media performance

Q2

Leverage landscape to develop brand plans

Brand Plans include

- Recap of brand performance
- Brand strategy for next year
- Positioning
- Marketing plans
- Product specific changes
 - Renovations
 - New products
- 3 YR Horizon roadmap
- Financial Targets (GR\$)

Brand Plans are presented to leadership across Mkt, Sales, R&D, Finance to gain alignment for next year

Create sales plans and decks for retail meetings base on BPs

Q3

Marketing broadly distributes sales materials and partners with sales on retailer specific needs

Development of next cycles releases begins (Late Q2/Q3)

- Media/Comms Plans
- New products
- Renovations

Data used for releases

- Comms Plans
 - Survey
 - Panel
- New Products/Reno
 - Industry Reports
 - POS
 - Survey

Q4

Honing of next cycle releases takes place and production begins (Q3/Q4)

- Comms Plans
 - Survey for commercial appeal
- New Products/Reno
 - Actual product testing begins
 - Survey on final language for packaging
 - Packaging testing takes place
